REMARKS

The figures of births and deaths shown in this statement for week ending the 21st January, 1956, relate to 188 towns with an estimated population of 27,288 thousands. The total number of towns is 313 and their population is 41,203 thousands. Thus 60% of the total number of towns representing 66% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 14,430 and 5,693 representing birth and death rates of 27.5 and 10.8 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 152 towns with an estimated population of 21,876 thousands. Information about Ajmer, Bihar, Delhi and Madras could not be included. The total number of towns is 251 and their population is 33,402 thousands. Thus 61% of the total number of towns representing 65% of the total

population is covered. The number of births and deaths recorded in these towns were 12,114 and 4,823 representing birth rates and death rates of 28.8 and 11.5 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 36 towns with an estimated population of 5,412 thousands. The total number of towns is 62 and their population is 7,801 thousands. Thus 58% of the total number of towns representing 69% of the total population is covered. The number of births and deaths recorded in these towns were 2,316 and 870 representing birth and death rates of 22.3 and 8.4 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
